

# The words of the Congress

---

## MONDOVISION

The conference is also for young people.

The students of the «Auxilium» Faculty have formed a team and are organizing a Salesian youth artistic evening to be held on 28 September 2022, the main theme of which is “I CARE: educating is a thing of the heart”.

The “Salesian Vision World” brings together young men and women from different countries to artistically express the Salesian charism, the dream of St John Bosco and St Mary Domenica Mazzarello to educate the new generations.

An evening dedicated to the beauty that the fruits of the Preventive System have brought into the lives of young people, expressed with dance, song, mime, music, land art, painting, sand art, dance with ultraviolet light, poetry, stories ...

We talk about it with Elisa Brizi and Martina Boscherini, members of the organizing team.

Hi, I'm Martina! Hi, I'm Elisa!

We are two students of the «Auxilium» Faculty.

Mondovision is an event that will be held during the evening of the International Conference organized by the Auxilium Faculty. It is an initiative created and conceived by us young people, with the aim of representing and manifesting the Preventive System in the various artistic forms.

We thought of an artistic evening because, as Don Bosco and Maria Mazzarello taught us, education is an art, or rather the art of educating young people.

For this reason, we have thought of artistic expression, which is different for each culture. In this way, the various countries can freely choose their mode of expression.

The ultimate goal of this event is precisely to give all young people who come from different parts of the world the opportunity to manifest the Preventive System in different artistic forms: a dance, a song or a poem.

It is an evening organized by us young people for young people and we can define it as a unique experience!

We are lucky to be part of the organization of this event! The first videos are already on the way. Working side by side with and approaching the different cultures, the different artistic expressions is an experience that will surely enrich our background.

We can consider ourselves really lucky: we have the opportunity to deal with different cultures, which make us understand how the Preventive System manifests itself in a thousand different forms.
